A Temporal partitioning of change across biological domains
Exact whole-profile timing tests: gene vs taxonomy p = 0.274; N activities vs gene p = 0.002

B Land-use-associated divergence relative to Stable PP
Stable permanent pasture is the contemporary interannual reference
Taxonomy
N functional-gene potential
Potential N activities
Norm of mean PP-referenced change vector
p=0.031; q=0.047
p=0.500; q=0.500
p=0.875; q=0.969
p=0.969; q=0.969
p=0.031; q=0.047
p=0.031; q=0.047
C Heated-Control divergence in temporal change
Temporal change under Heated minus temporal change under Control
Norm of mean Heated-Control change vector
p=0.062; q=0.188
p=0.906; q=0.906
p=0.281; q=0.609
p=0.906; q=0.906
p=0.031; q=0.094
p=0.094; q=0.141
Taxonomy
N functional-gene potential
Potential N activities
