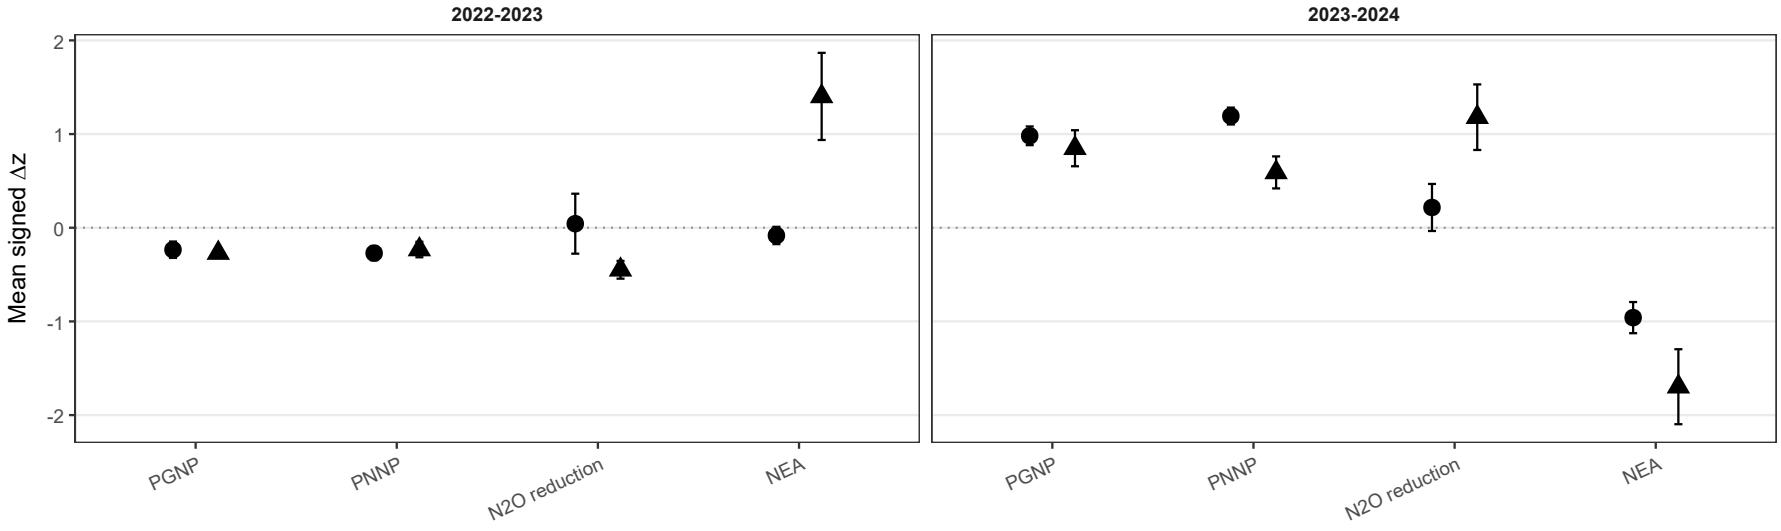
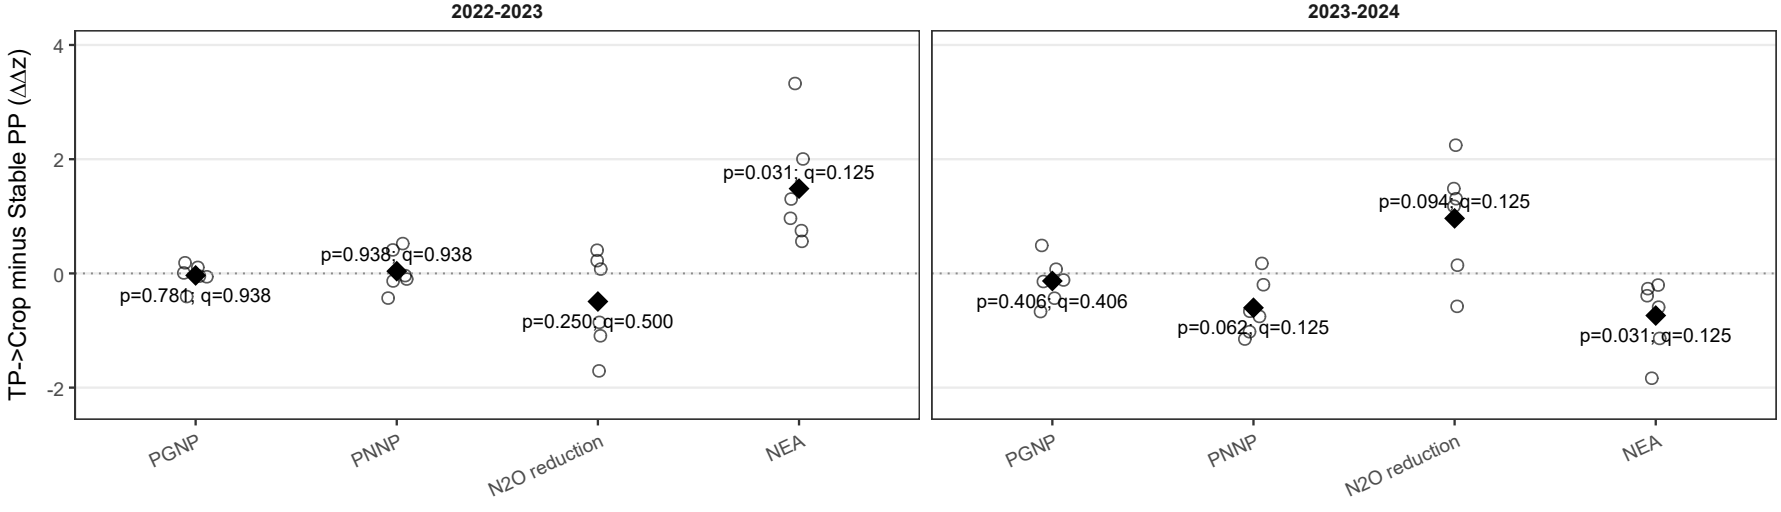
A Potential N-activity changes in the two land-use trajectories

Means and SE across 6 independent profiles; three depths averaged within profile



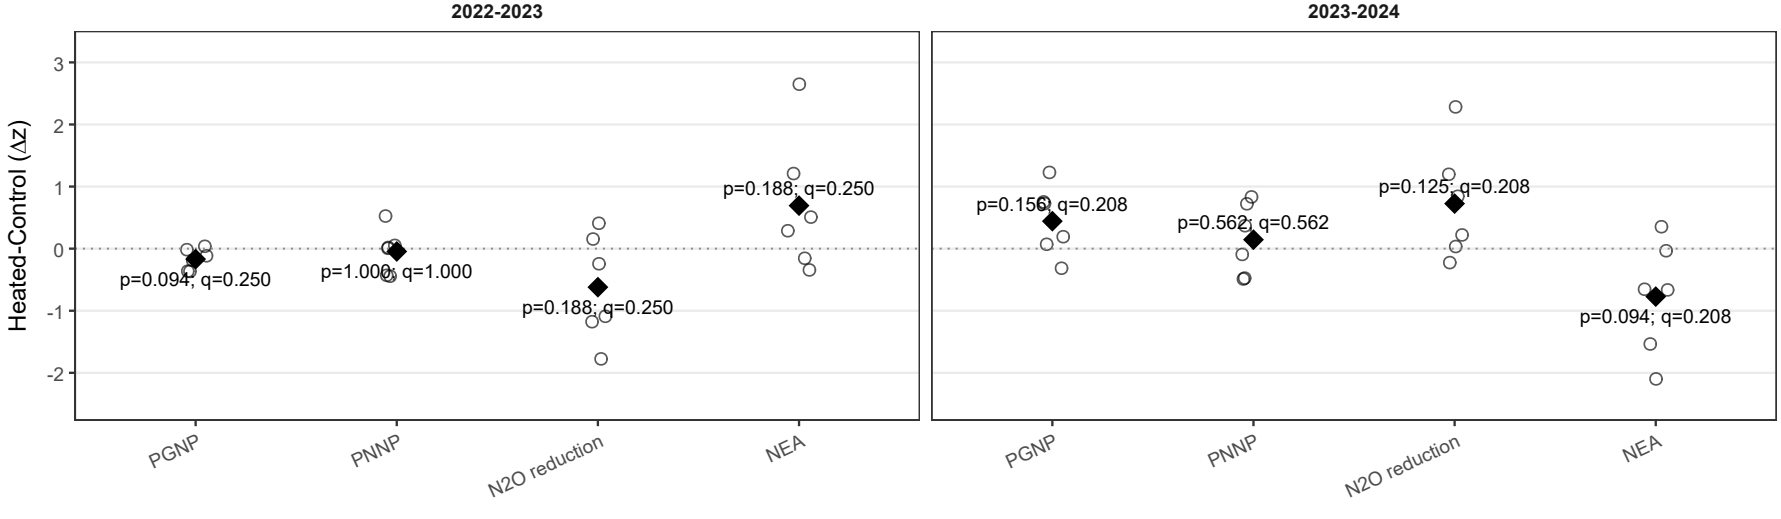
B Land-use-associated process divergence

Open circles = 6 profile-pair inference units; black diamond = mean; labels: exact p; within-interval FDR q



C Warming-associated process divergence

Open circles = 6 profile-pair inference units; black diamond = mean; labels: exact p; within-interval FDR q



Land-use trajectory ● Stable PP ▲ TP -> Crop
